---

Bonsai care is very different from the care you give to your ordinary house plant. A lot of people who receive bonsai as a gift from a friend, are not aware of proper bonsai care and ends up killing the bonsai. Bonsai care is often not taught in detail by commercial bonsai gardens. I know a lot of people who are discouraged going in to bonsai due to past experiences. Bonsai maintenance is not that difficult. It only takes a little understanding of what a bonsai is and then do regular care as described in this section.

Articles here pertain to activities that you do regularly to keep your bonsai healthy. Click the menu under Bonsai care to the right.
